

Steep Slope roofing systems are typically roofing material for roof slopes having a slope of 3:12 or greater.

Types of Steep Slope Roofing Systems:

Shingles:

- Asphalt Laminated Shingles
- SBS Modified Asphalt Laminated Shingles
- Traditional/Strip Asphalt Shingles
- Composite/Synthetic Shingles

Tile:

- Concrete/Clay
- Single Ply PVC or Velcro

Simulated-Metal Roofing System:

- Single-Ply membrane roof systems with heat welded profile ribs
